

USGS National Land Imaging Program Overview

NGAC

8 December 2021

Tim Newman

USGS Program Coordinator

Landsat 9

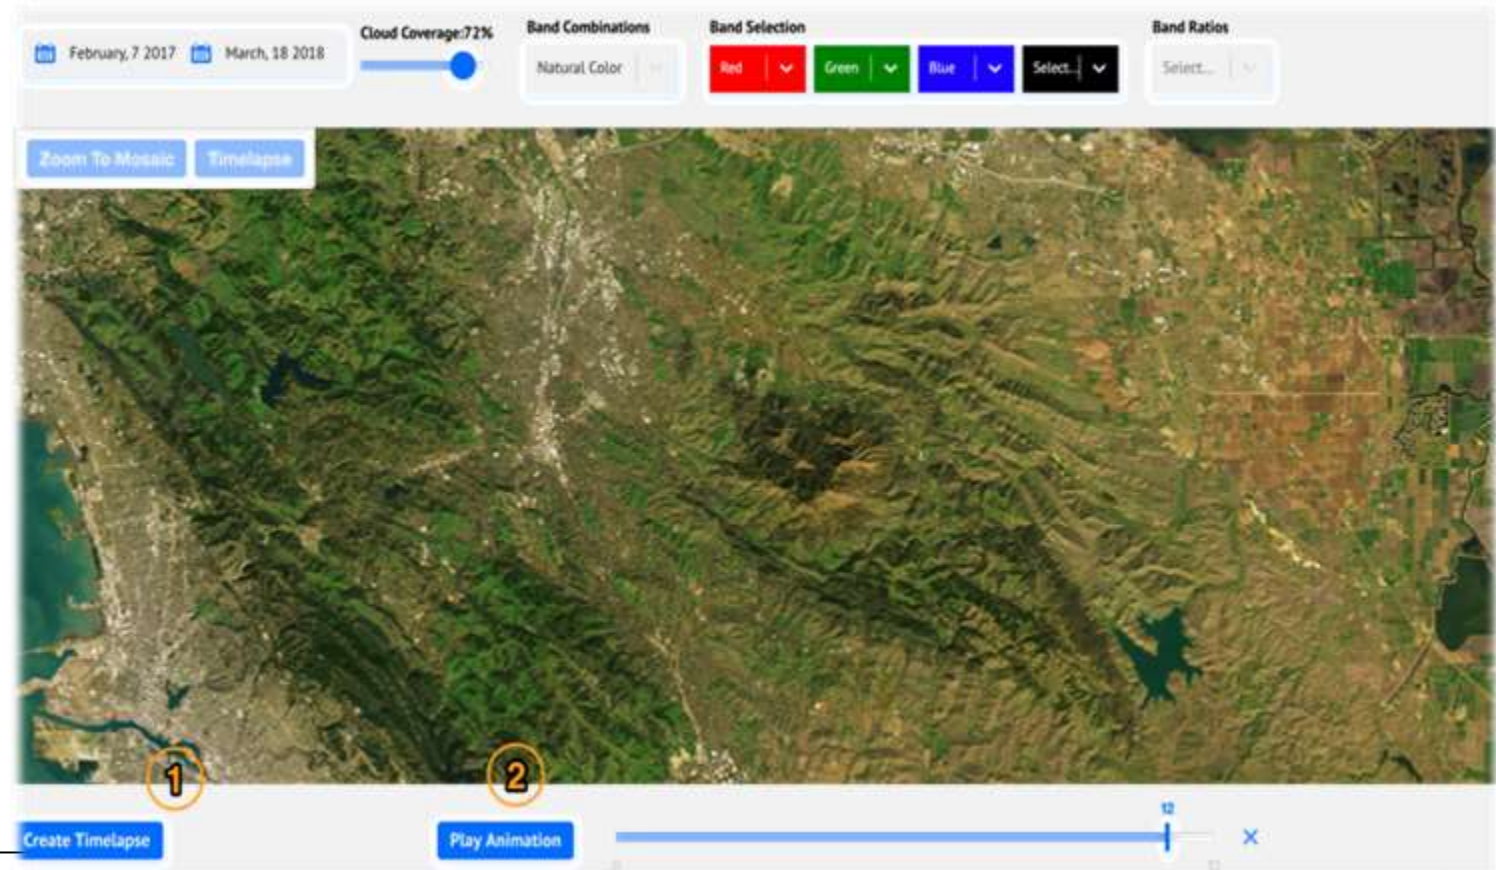

- Launched 9/27/21
- Deployed successfully
- On-orbit checkout underway
- Mission handover to USGS early in 2022y

Landsat Collection 2 in the Cloud

Landsat Collection 2 was released to the public in 2021

- **Improved radiometry, geometry, metadata and access – Level 1 *and* Level 2 products (Surface Reflectance, Surface Temperature)**
- **New tools for search and discovery**
- **Direct access to data**
 - ❑ Define area of interest
 - ❑ Stack data temporally
- **U.S. Analysis Ready Data (US ARD) tiles released**
- **Over 600 million data granules retrieved through direct access**

PECORA 22

Opening the
Aperture to Innovation:
Expanding Our Collective
Understanding of a
Changing Earth

October 23-28, 2022
Denver, CO • Hilton City Center

Celebrating
50
YEARS
of Landsat
1972-2022

Pecora-22: October 23-28, 2022

Denver, Colorado

- Our flagship land-imaging satellite applications conference, and a longstanding USGS-NASA partnership
- Highlights Landsat's 50th anniversary
- Conference will feature Landsat 9, Landsat Next and the many innovative developments in government and commercial land-imaging programs
- Website: pecora22.org **CALL FOR PAPERS NOW**
